

Marimba by HARMAN

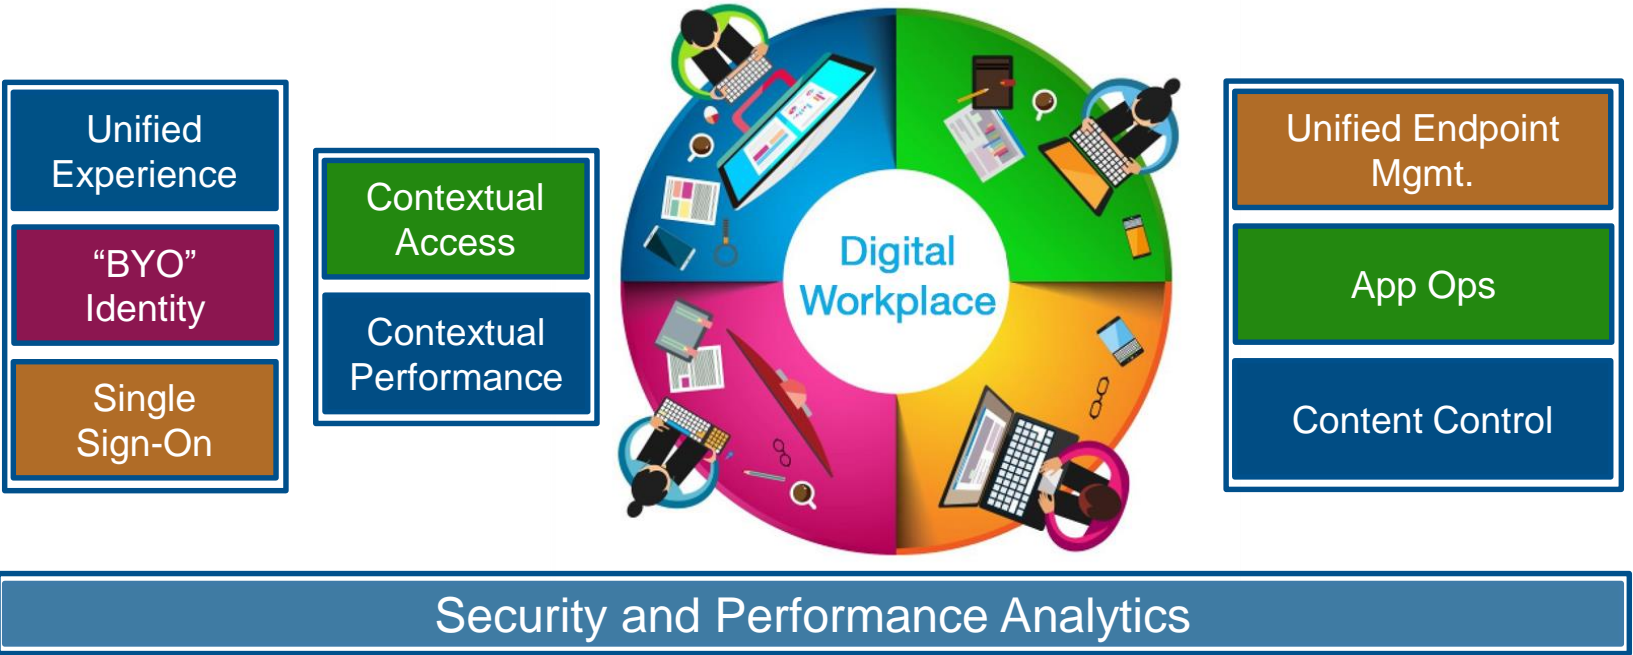

Modern, Scalable, and Secured Endpoint Management

Product Roadmap – January 2018

Nitish Shrivastava
Product Management & Chief Architect

A digital workplace is a business strategy to boost employee agility and engagement through a more consumerized work environment. While each one is different, successful digital workplaces share characteristics that maximize the creative potential of the workforce and allow new ways of working that deliver better business outcomes.

At Harman, we build products and solutions to help customers enable new and more effective ways of working; raise employee engagements and agility, and exploit consumer-oriented styles and technologies.

- Unified Endpoint Mgmt.
- App Ops
- Content Control

Security and Performance Analytics

Harman's Cognitive and NLP IPs

Clarinet - Harman's Vulnerability and Patch Management

Logsight – Real time monitoring framework for connected devices

Marimba is transformed into a product that lets you manage all connected devices, applications, and user workspaces through one integrated intuitive system irrespective of your enterprise mobility - BYOD, COLD, or COPE. All connected devices & linked applications and their users can be managed & monitored from the Universal Console.

The platform is infinitely scalable and gives secure transfer and management of data even over slower bandwidths using advanced communication protocols. This allows operations at lower costs and in turn it saves over 70% of operational cost.

Any Endpoint

Any Use Case

Knowledge worker
Corporate | BYO

Task worker
Line of Business

No user
Kiosk | IOT

Modern Management Framework

Out of box configuration

Over-the-air management and updates

Asset tracking

Policies and security settings

Full lifecycle management
